## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

RESPONSE TO NOTICE TO FILE CORRECTION APPLICATION PAPERS

APPLICANT: Thomas Ohlsson

SERIAL NO.: 09/843,987 GROUP ART UNIT:3762

FILED: April 27, 2001

TITLE: "INTERFACE UNIT FOR AN ELECTROPHYSIOLOGY MEASUREMENT SYSTEM"

Assistant Commissioner for Patents,

Washington, D.C.

S I R:

Applicant received a Notice to File Corrected Application Papers dated June 25, 2001 (copy attached) requiring a substitute specification in compliance with 37 C.F.R. §1.52 because it was stated that the papers contained hand lettering.

In fact, the only hand lettering is in the claims, and since a substitute specification does not include the claims, submission of a substitute specification would not cure the alleged problem. Applicant therefore herewith submits a "clean" version of the claims as originally filed, wherein all of the handwritten changes are embodied as typewritten claim language. Other than avoiding the use of handwriting, the claims set forth below are identical to the claims as originally filed, and therefore this is *not* a claim amendment.

IN THE CLAIMS

Sub B1. An interface unit for use with an electrophysiology measurement system having an electrophysiology monitoring system and a plurality of catheter-mounted sensors respectively connected to sensor electrical connectors, said interface unit comprising:
